

# Scheduler Job

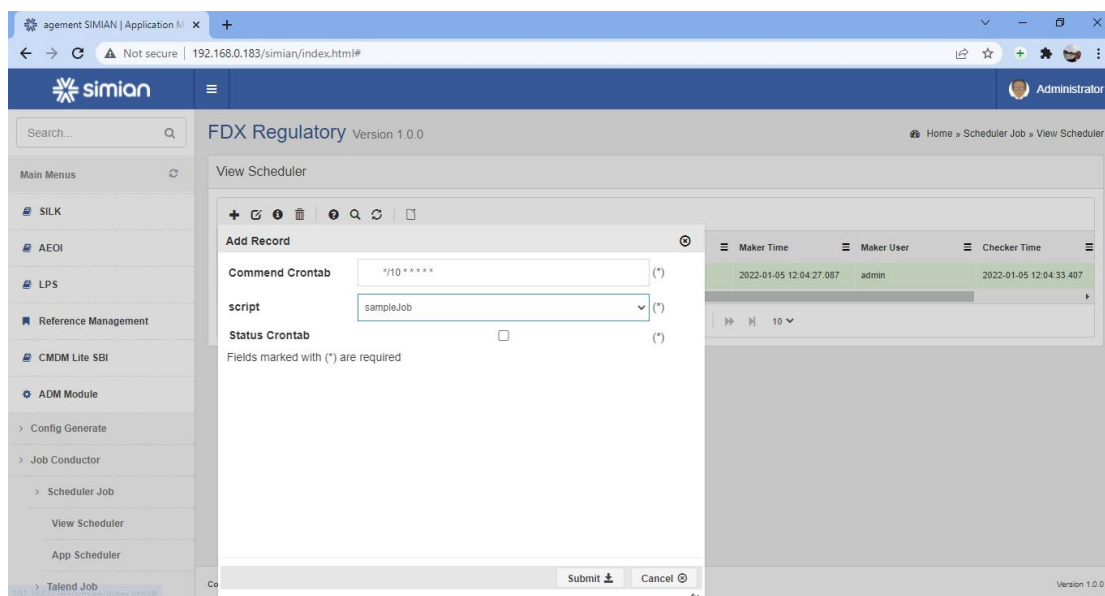

## 1. View Scheduler

Initial view of the scheduler menu, this scheduler menu functions to adjust the schedule of the apps menu.

## 2. Add Data Sceduler

When adding data there is a Command Crontab field that must be filled with code. In addition there are Scripts and Crontab status that must be selected so that Scheduler can run.

### \*Note

Crontab yg kita pake ada 6 digit :

- ke 1 = untuk second (0-59)
- ke 2 = untuk minute (0-59)
- ke 3 = untuk hour (0-23)
- ke 4 = untuk hari (1-31)
- ke 5 = untuk bulan (1-12)
- ke 6 = untuk minggu (1-7)
