

User Management

This Group Management menu functions to manage the menus that will be displayed in Apps.

The first step is to use this menu by selecting user access rights. After that select which module to edit in the green box.

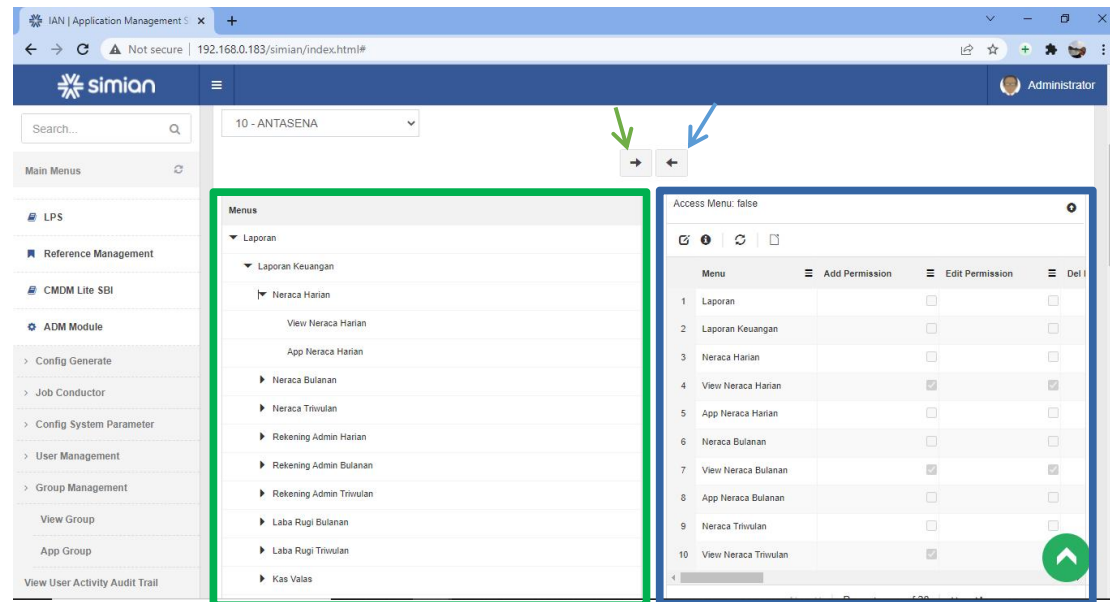

After selecting the module a menu will appear inside the module, as below:

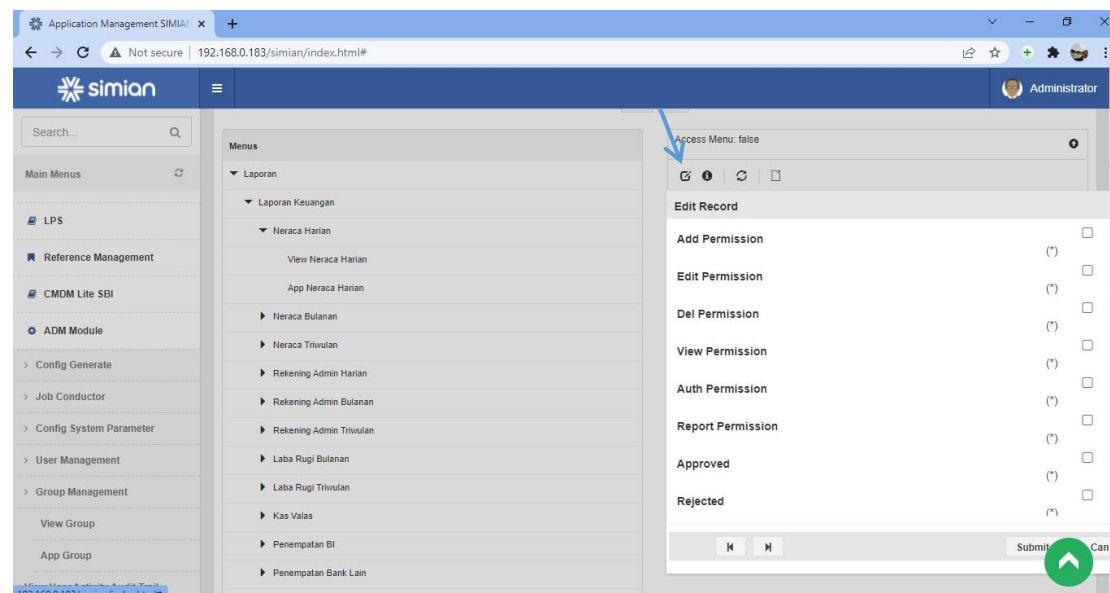

The blue box is the menu that appears in the application, and the green box is the menu that belongs to the module.

Notes:

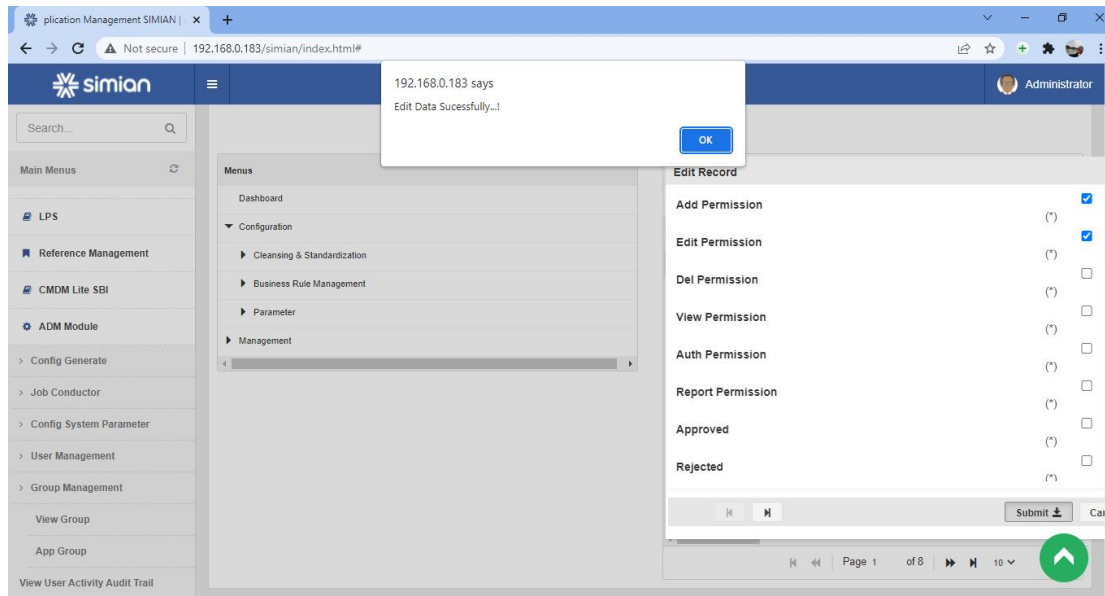

- Green arrow for Add menu to app.
- Blue arrow to clear menu to application.

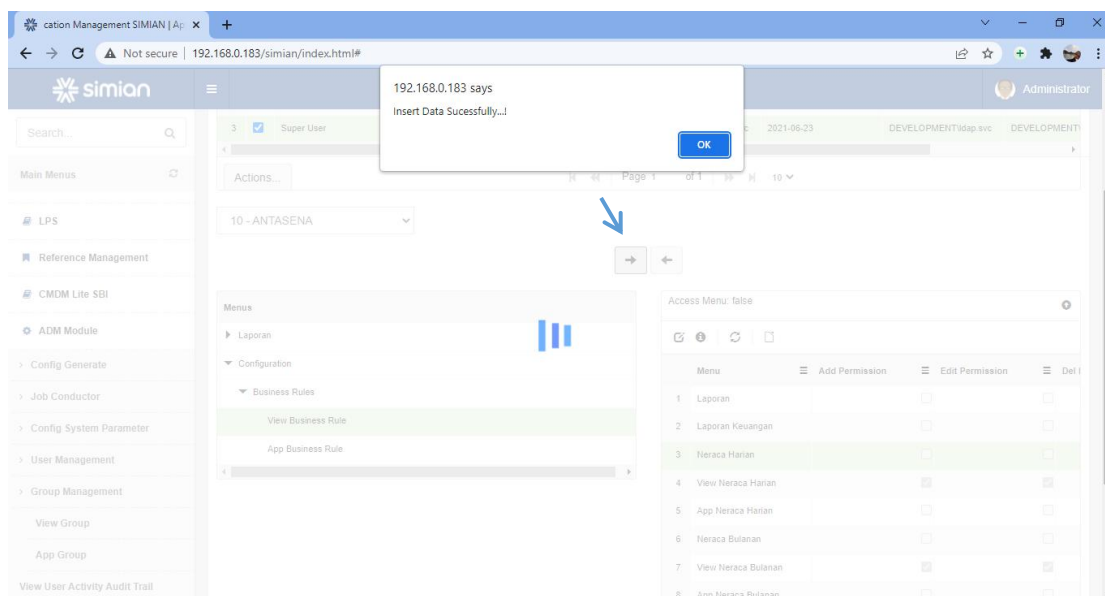

To Edit Permission Menu, we select one of the rows we want to edit, then click the button directed by the arrow, and select the checkbox to give permission to each menu then click submit.

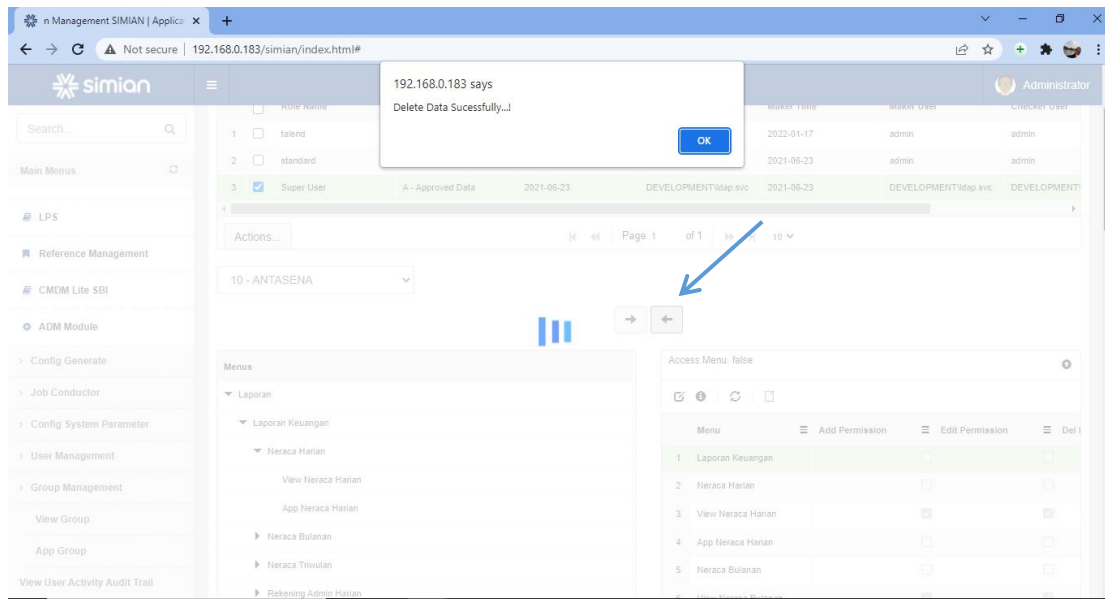

After submitting, a notification will appear as below:

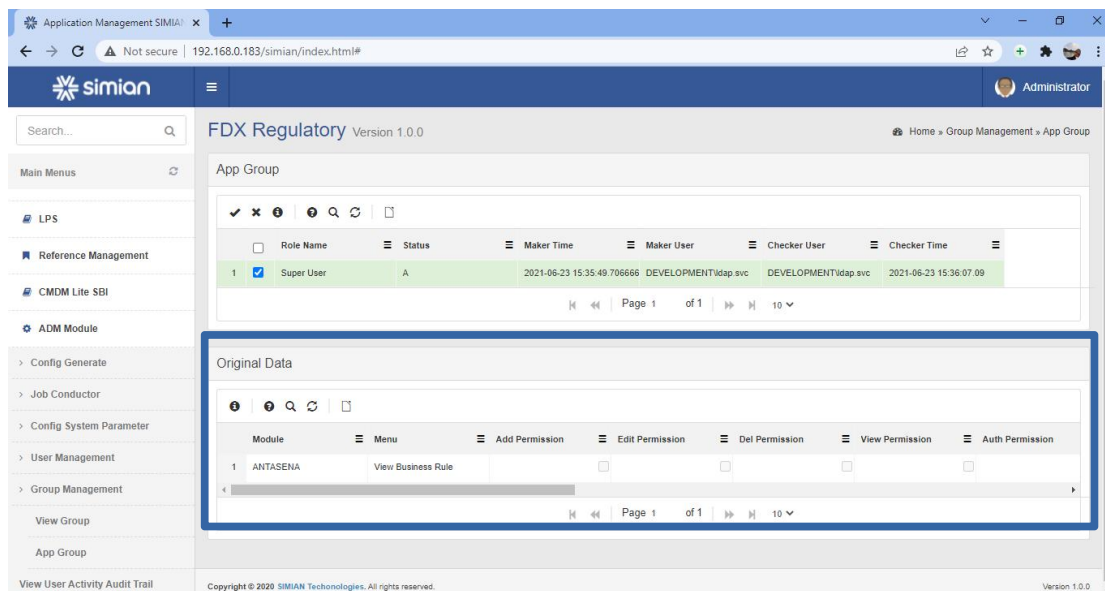

To save the menu into the application, we can select one of the menus on the left, after that click the symbol directed by the arrow, after which a notification will appear like this:

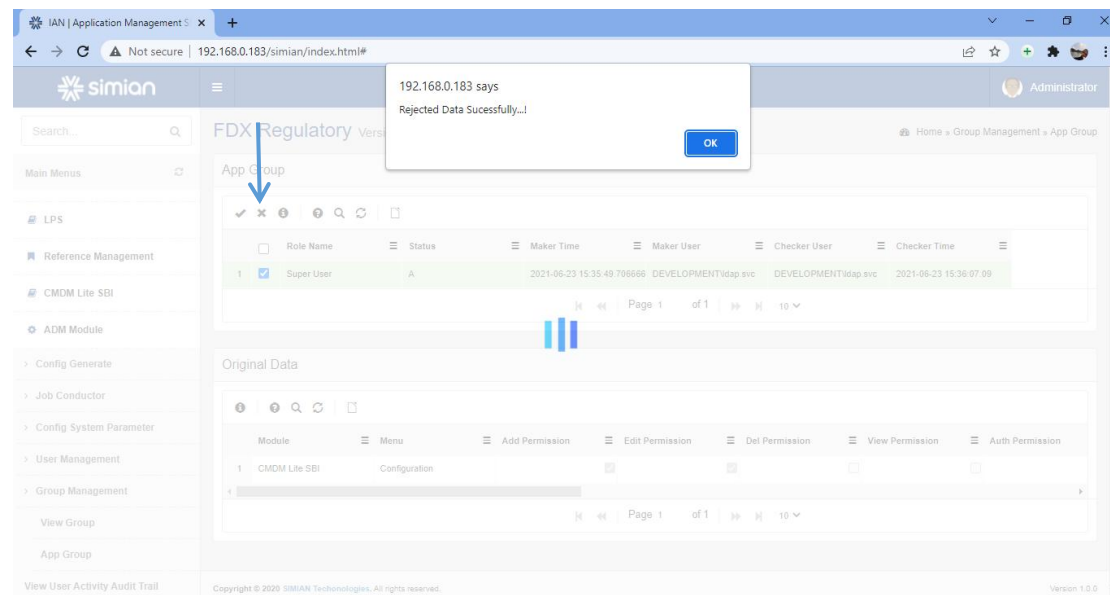

For the Delete menu in Apps, select the menu you want to delete and click the symbol indicated by the arrow, if the delete process is complete, a notification will appear as below:

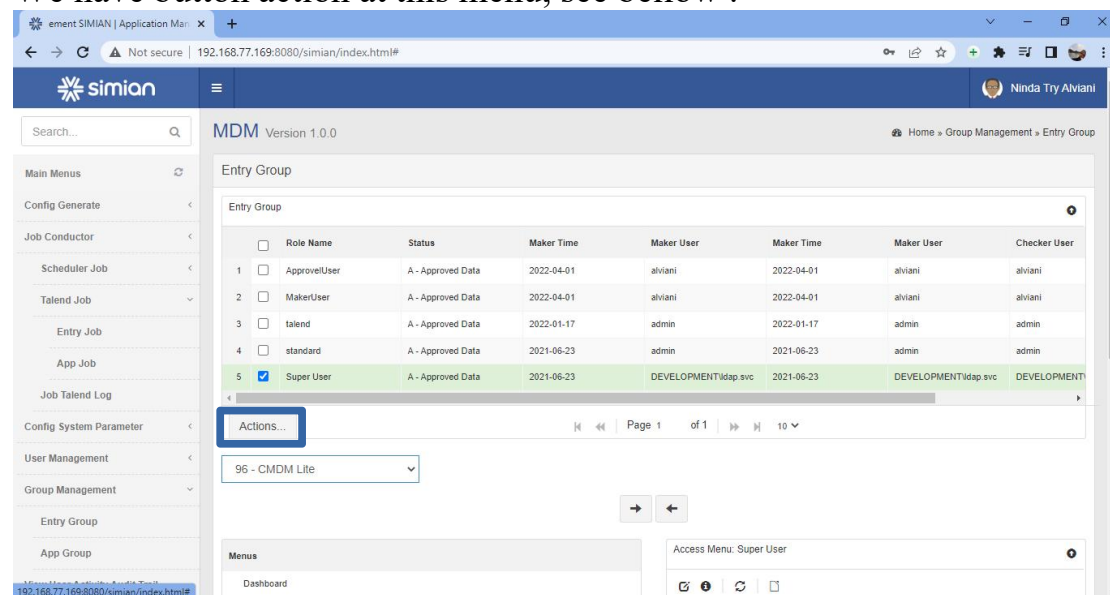

Next in the Approval Menu, we can choose the access rights that will approve it. When we select the checkbox of the user's access rights, the menu details that we edit or delete will appear as shown below:

When we reject data, a notification will appear as below:

We have button action at this menu, see bellow :

That button have function :

- Add New Row
- Edit Selected Row
- View Selected Row
- Delete Selected Row
- Find Records
- Reload Grid
- Approval
- Rejected
