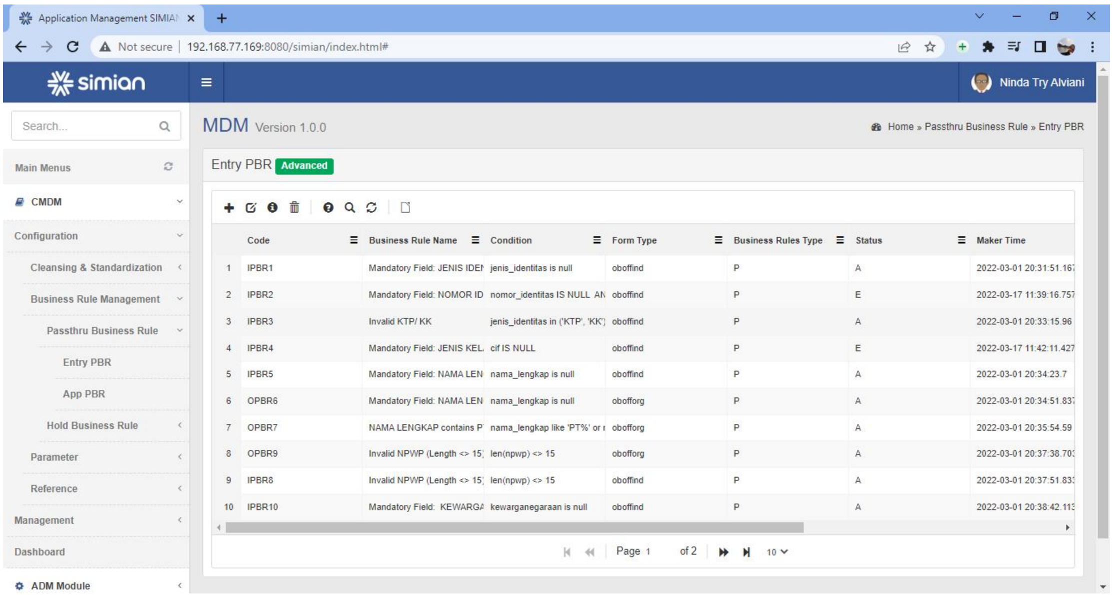
BUSSINESS RULE MANAGEMENT

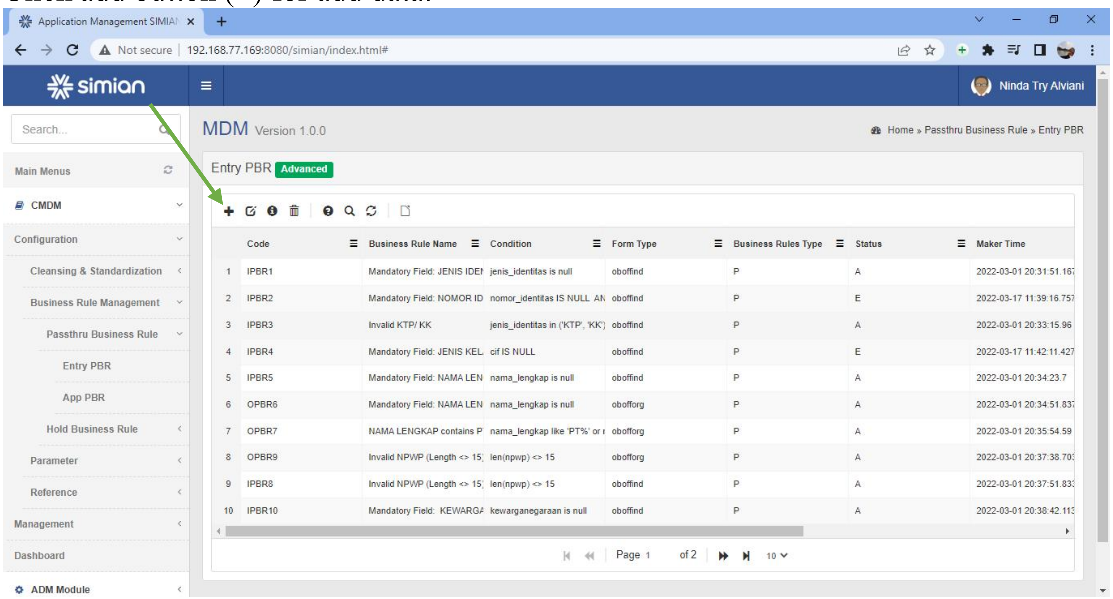
1. View Data

When we click the View menu, the following screen will appear :

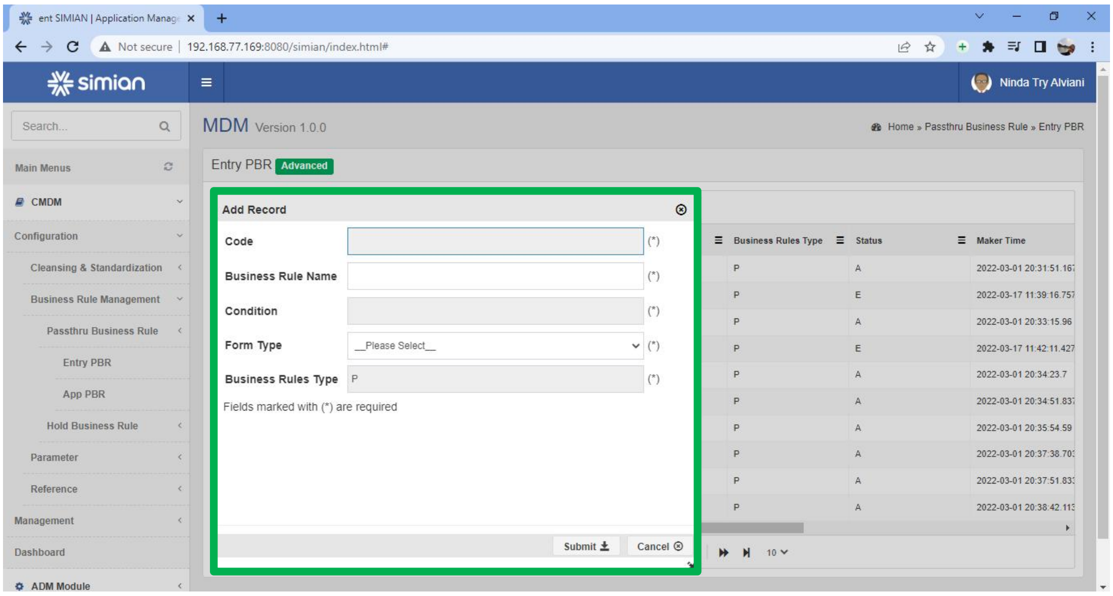


2. Add Data

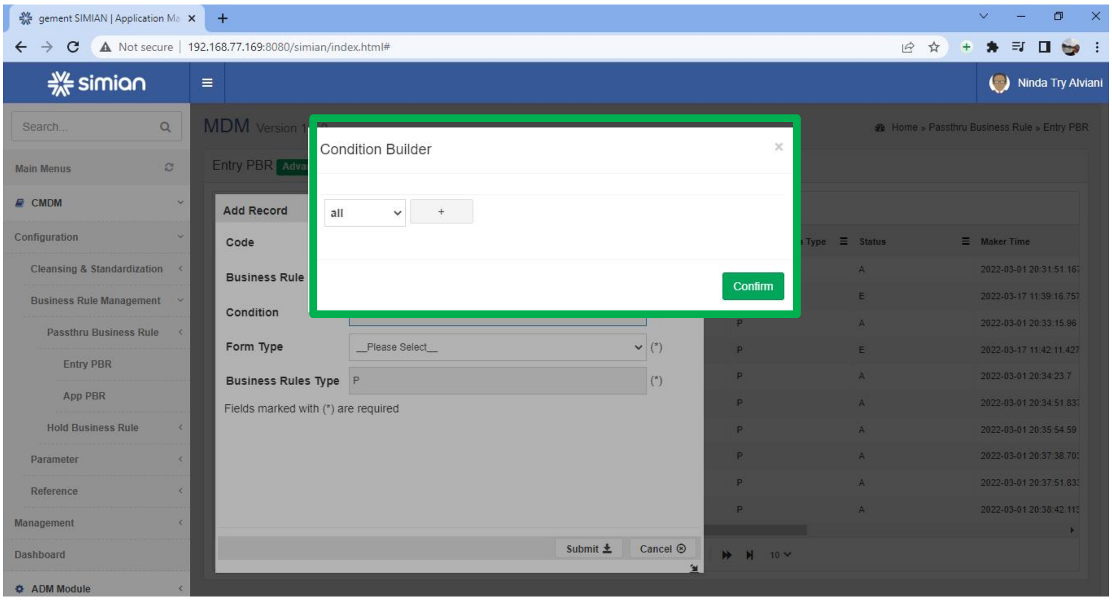
Click add button (+) for add data:



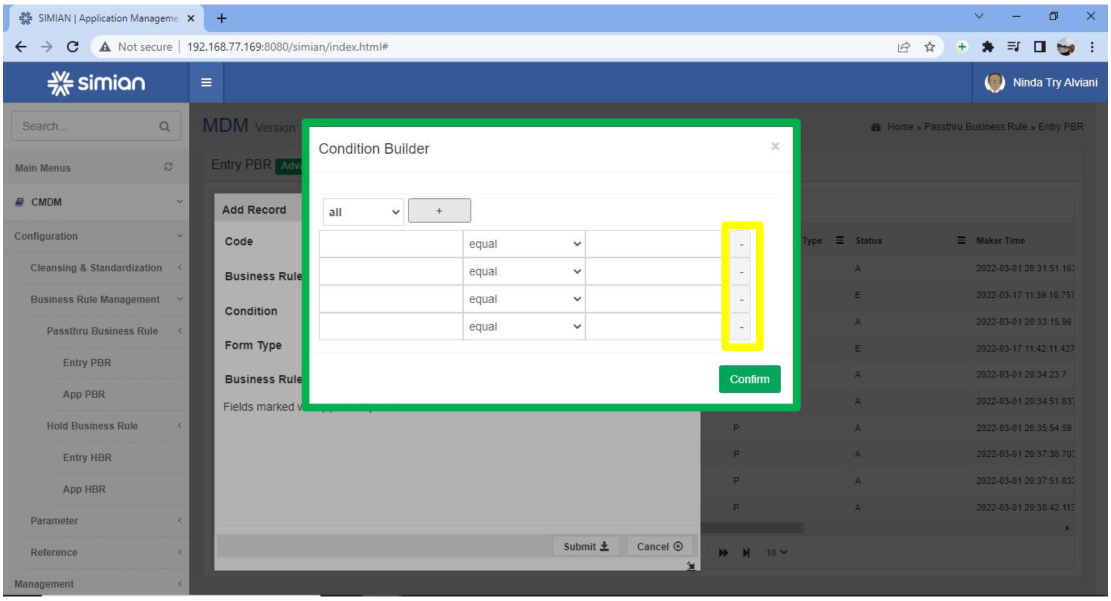
Then a form will appear, as follows:



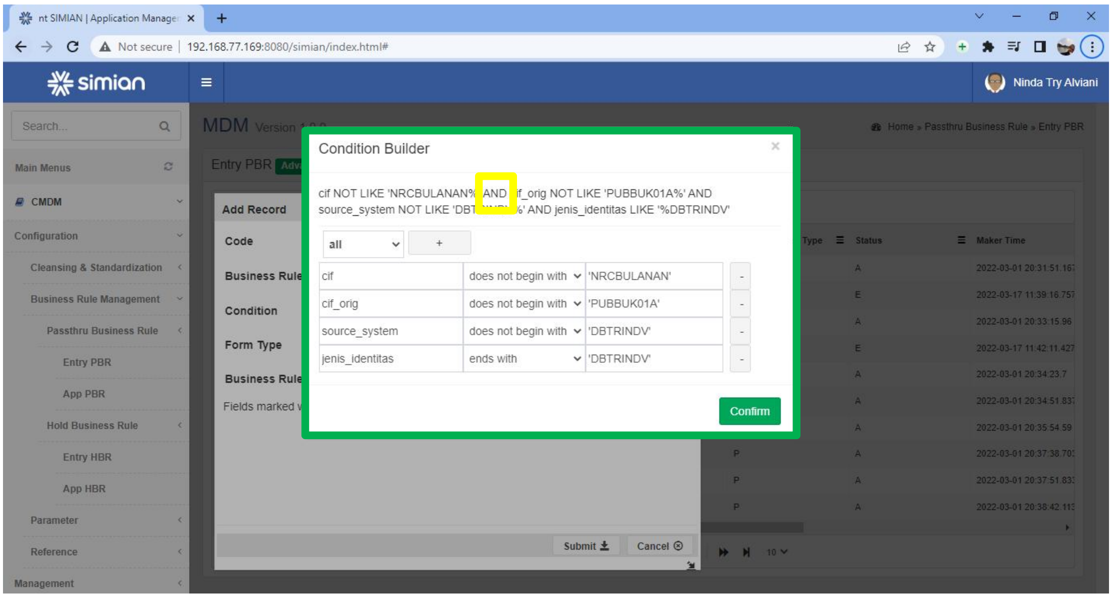
Fill an all fields, when we click field **condition,** a form will appear as below:



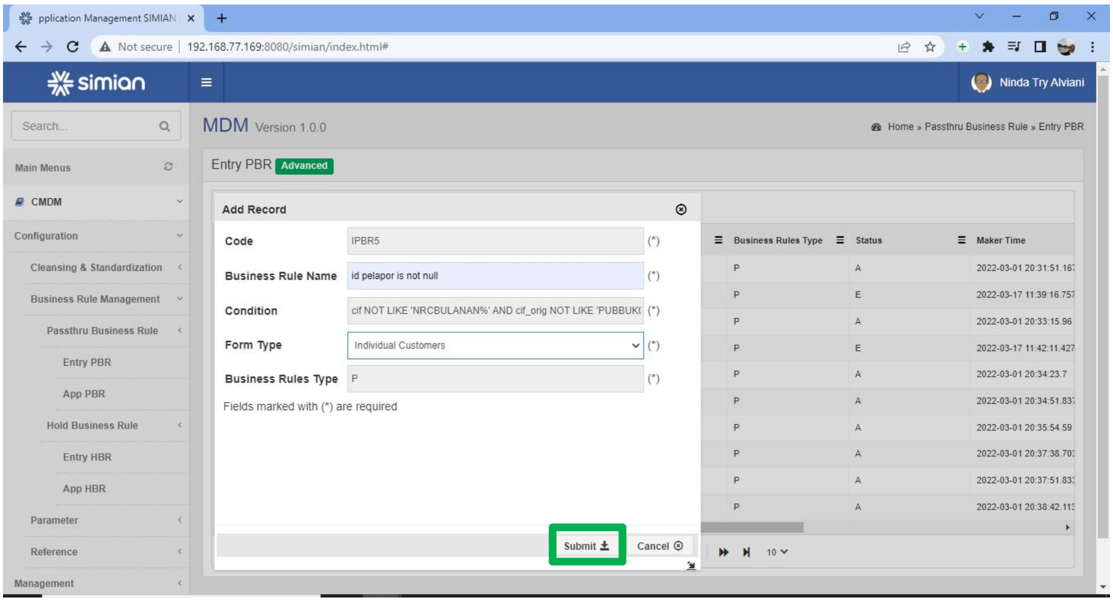
Look at the form, we have two options on the select menu (all and any), and we have add button (+).
When we click add button, form will shown field selection for choosing condition builder, see bellow :



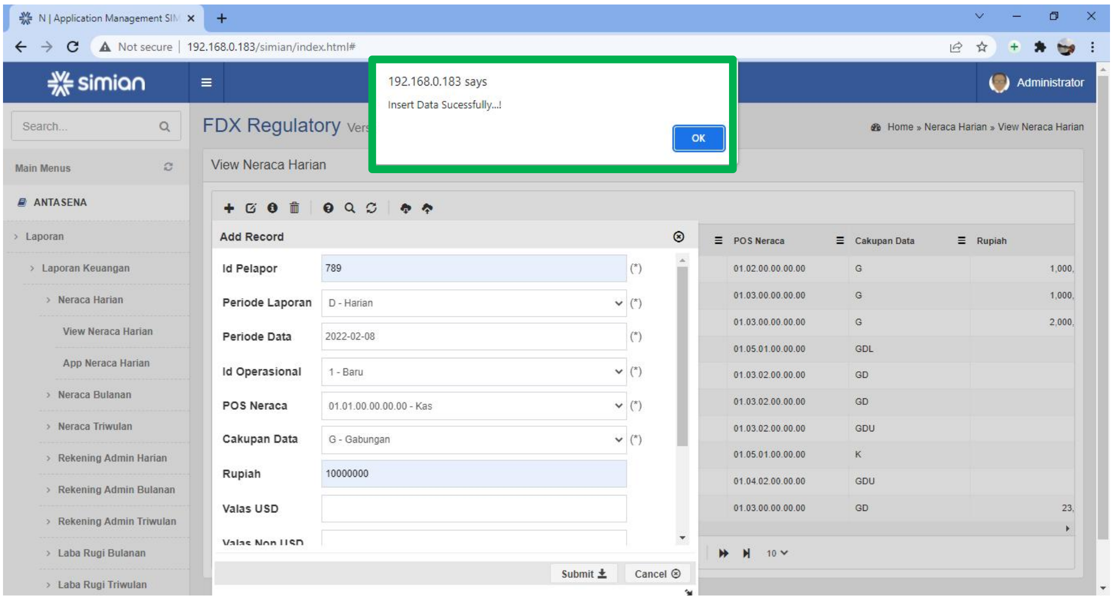
Note : we can delete rule using button min (-) like button marked yellow.
Fill an all fields, and for field string we must input using semi colon ('), then form will showing like this :



Pay attention to the form, when we choose selection all, the condition will be **“and condition”,** like text above marked with yellow. And when we choose any condition, the text will be **“OR”.** then click confirm button when we finish.

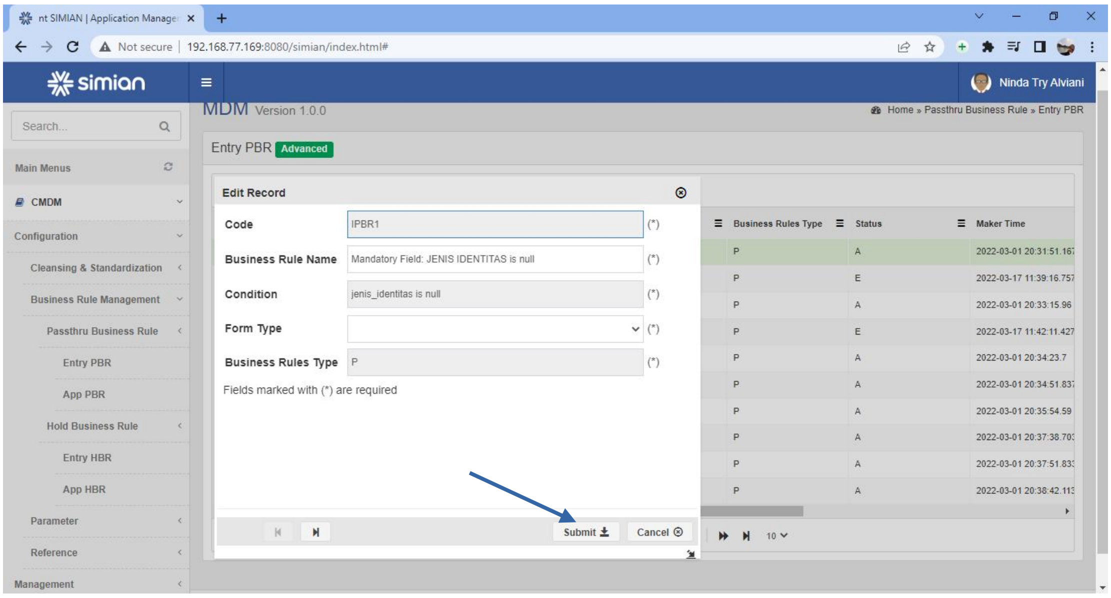


After all field filled, click button submit, like above.
If the data successfully add, a success notification will appear.



3. Update Data

Note : must first select the selected row to edit, then change the data to be replaced. After filling is complete, click submit to save changes.



The condition for update, same like when we want to add.

After the changes are complete, a notification will appear as below:
