Scheduler Job

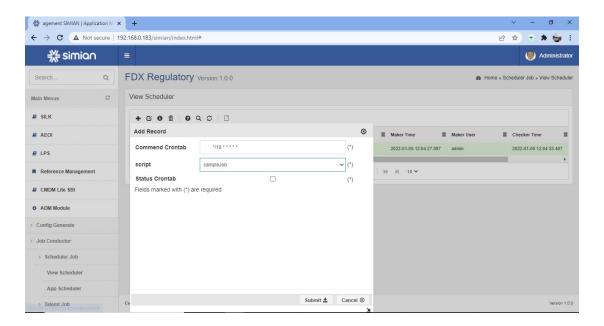

1. View Scheduler

Initial view of the scheduler menu, this scheduler menu functions to adjust the schedule of the apps menu.

2. Add Data Sceduler

When adding data there is a Command Crontab field that must be filled with code. In addition there are Scripts and Crontab status that must be selected so that Scheduler can run.

*Note

Crontab yg kita pakai ada 6 digit :

- ke 1 = untuk second (0-59)
 ke 2 = untuk menute (0-59)
- ke 3= untuk hour (0-23)
- ke 4 = untuk hari (1-31)
- ke 5 = untuk bulan (1-12)
- ke 6 = untuk minggu (1-7)
